

# ELEADORA

## **ELEADORA organic extra virgin olive oil 750 ml, 3 lt, 5 lt & 18 lt**

The ELEADORA organic extra virgin olive oil is produced and bottled in Monemvasia, in the southeastern Peloponnese, the land of the Spartans. The olive groves are located on slopes, sunbathing under the mediterranean sun, at a maximum distance of 3 Km from the coast. The climate is dry with minimum of rainfall during the year, falling mostly during the winter months. Cool breezes from the north create low levels of humidity that contribute to the excellent health of our olive trees.

The ELEADORA is produced from the local unique variety “Athenolia” and the famous “Koroneiki”. The combination of these varieties gives a full bodied, peppery and fruity - with an attractive green gold color - olive oil. Also, most of the olive trees are centuries old and are being cultivated in our land continuously for ages, offering superior category olive oil obtained directly from freshly picked olives and extracted solely by mechanical means. We use only the method of cold extraction in order to preserve the organoleptic ingredients of the product.

Our quality characteristics are better than the Regulation EU No 2568/91: Acidity < 0.4%, Peroxides (mEq) < 20, Waxes < 250, Ultraviolet absorption K270 < 0.22 - K232 < 2.50 - Delta-K < 0.01.

The ELEADORA is 100% natural organic olive juice and not blended with any other lower grade olive oils. It is the best choice to use as an all around vegetable oil, while it is ideal for bread dipping, salad dressings, marinades and of course for cooking, and baking. It is very easy to enhance the taste of your food, simply, by adding it during the cooking process, and also by pouring it over already cooked food.

As a company we continue our family’s long tradition in olive tree cultivation and most nature friendly olive oil extraction. From this ancestral past we convey memories, knowledge and love for the sacred olive tree, that are embodied in the final precious product, which we offer with a lot of care and respect to you. The farmers and the mill are certified by BIO-HELLAS. Additionally, our company is certified by the inspector body TÜV NORD INTEGRA and our product is 100% USDA certified organic.
